Chalybeate Restorative PILIS OF IRON.

An aperient and Stomachic preparation of 180N purified of Oxygen and Carbon by combustion in Hydrogen. Sanctioned by the highest Medical Authorities, both in Europe and the United States, and thorities, both in Europe and the United States, and

which the playsician has no name.

In Nervous Affections of all kinds, and for reasons In Nervous Absections of all kinds, and for reasons familiar to medical men, the operation of this preparation of iron must necessarily be salutary, for, unlike the old oxides, it is vigorously tonic, without being exciting and overheating; and gently, regularly aperient, even in the most obstitute cases of larly aperient, even in the most obstinate cases of costiveness without ever being a gastric purgative, or indicting a disagrecable sensation.

It is this latter property, among others, which makes it so remarkably, effectial and permanent a remedy for Pilos, upon which it also appears to exert a distinct and specific action, by dispersing the local tendency which forms tiem.

In Dysrepsia, innumerable as are its causes, a single box of these Chalybeate Pills has often sufficed for the most habitual cases, including the attendent Coativeness.

DRY GOODS In uncheeked Diarrhora, even when advanced to Dysentery, confirmed, emancianing, and apparently malignant, the effects have been equally decisive and astonishing.

In the local pains, loss of flesh and strength, debilitating cough, and remittent heetic, which generally indicate Incipient Consumption, this remedy has allayed the niarm of friends and physicians, in several very gratifying and interesting instances.
